

## NOTE FROM THE EDITORS

It has been a great pleasure to compile the 2019 edition of the Chemistry News Magazine, a fantastic platform to showcase our diverse and highly successful research groups and their progress over the last year. In addition to research, Chemistry News 2019 highlights the department's excellent track record in teaching. Over the past year, the department has made great progress on digitizing the teaching of chemistry and introducing new programmes, courses and initiatives. As the new editors, interacting with staff and students from all areas of our Department has been a heartening and enjoyable experience. Our thanks are extended to everyone who contributed to this edition; in particular Heikki Tenhu, Mikko Ritala, Mikko Oivanen, Riitta-Leena Inki and Veikko Somerpuro. We are left to congratulate all those featured in this issue for their many achievements and to wish those leaving the Department the very best of luck in their future endeavours. Here's to an exciting and prosperous scientific year ahead!

Editors 2019

**William Bower**

University Researcher, Radiochemistry Unit

**Johannes Perna**

University Lecturer, Chemistry Teacher Education Unit

Over the past year, the department has made **great progress on digitizing the teaching of chemistry** and introducing new programmes, courses and initiatives.
