INTERNATIONAL EVALUATION OF RESEARCH AND DOCTORAL TRAINING AT THE UNIVERSITY OF HELSINKI 2005–2010

RC-Specific Evaluation of NordSoc – The Nordic Society in Cross-disciplinary and Transnational Perspectives

Seppo Saari & Antti Moilanen (Eds.)
INTERNATIONAL EVALUATION OF RESEARCH AND DOCTORAL TRAINING AT THE UNIVERSITY OF HELSINKI 2005–2010

RC-Specific Evaluation of NordSoc – The Nordic Society in Cross-disciplinary and Transnational Perspectives

Seppo Saari & Antti Moilanen (Eds.)
Summary:
Researcher Community (RC) was a new concept of the participating unit in the evaluation. Participation in the evaluation was voluntary and the RCs had to choose one of the five characteristic categories to participate.

Evaluation of the Researcher Community was based on the answers to the evaluation questions. In addition a list of publications and other activities were provided by the TUHAT system. The CWTS/Leiden University conducted analyses for 80 RCs and the Helsinki University Library for 66 RCs. Panelists, 49 and two special experts in five panels evaluated all the evaluation material as a whole and discussed the feedback for RC-specific reports in the panel meetings in Helsinki. The main part of this report is consisted of the feedback which is published as such in the report.

Chapters in the report:
1. Background for the evaluation
2. Evaluation feedback for the Researcher Community
3. List of publications
4. List of activities
5. Bibliometric analyses

The level of the RCs' success can be concluded from the written feedback together with the numeric evaluation of four evaluation questions and the category fitness. More conclusions of the success can be drawn based on the University-level report.

Foreword

The evaluation of research and doctoral training is being carried out in the years 2010–2012 and will end in 2012. The steering group appointed by the Rector in January 2010 set the conditions for participating in the evaluation and prepared the Terms of Reference to present the evaluation procedure and criteria. The publications and other scientific activities included in the evaluation covered the years 2005–2010.

The participating unit in the evaluation was defined as a Researcher Community (RC). To obtain a critical mass with university-level impact, the number of members was set to range from 20 to 120. The RCs were required to contain researchers in all stages of their research career, from doctoral students to principal investigators (PIs). All in all, 136 Researcher Communities participated in this voluntary evaluation, 5857 persons in total, of whom 1131 were principal investigators. PIs were allowed to participate in two communities in certain cases, and 72 of them used this opportunity and participated in two RCs.

This evaluation enabled researchers to define RCs from the “bottom up” and across disciplines. The aim of the evaluation was not to assess individual performance but a community with shared aims and researcher-training activities. The RCs were able to choose among five different categories that characterised the status and main aims of their research. The steering group considered the process of applying to participate in the evaluation to be important, which lead to the establishment of these categories. In addition, providing a service for the RCs to enable them to benchmark their research at the global level was a main goal of the evaluation.

The data for the evaluation consisted of the RCs’ answers to evaluation questions on supplied e-forms and a compilation extracted from the TUHAT – Research Information System (RIS) on 12 April 2011. The compilation covered scientific and other publications as well as certain areas of scientific activities. During the process, the RCs were asked to check the list of publications and other scientific activities and make corrections if needed. These TUHAT compilations are public and available on the evaluation project sites of each RC in the TUHAT-RIS.

In addition to the e-form and TUHAT compilation, University of Leiden (CWTS) carried out bibliometric analyses from the articles included in the Web of Science (WoS). This was done on University and RC levels. In cases where the publication forums of the RC were clearly not represented by the WoS data, the Library of the University of Helsinki conducted a separate analysis of the publications. This was done for 66 RCs representing the humanities and social sciences.

The evaluation office also carried out an enquiry targeted to the supervisors and PhD candidates about the organisation of doctoral studies at the University of Helsinki. This and other documents describing the University and the Finnish higher education system were provided to the panellists.

The panel feedback for each RC is unique and presented as an entity. The first collective evaluation reports available for the whole panel were prepared in July–August 2011. The reports were accessible to all panel members via the electronic evaluation platform in August. Scoring from 1 to 5 was used to complement written feedback in association with evaluation questions 1–4 (scientific focus and quality, doctoral training, societal impact, cooperation) and in addition to the category evaluating the fitness for participation in the evaluation. Panellists used the international level as a point of comparison in the evaluation. Scoring was not expected to go along with a preset deviation.

Each of the draft reports were discussed and dealt with by the panel in meetings in Helsinki (from 11 September to 13 September or from 18 September to 20 September 2011). In these meetings the panels also examined the deviations among the scores and finalised the draft reports together.

The current RC-specific report deals shortly with the background of the evaluation and the terms of participation. The main evaluation feedback is provided in the evaluation report, organised according to the evaluation questions. The original material provided by the RCs for the panellists has been attached to these documents.
On behalf of the evaluation steering group and office, I sincerely wish to thank you warmly for your participation in this evaluation. The effort you made in submitting the data to TUHAT-RIS is gratefully acknowledged by the University. We wish that you find this panel feedback useful in many ways. The bibliometric profiles may open a new view on your publication forums and provide a perspective for discussion on your choice of forums. We especially hope that this evaluation report will help you in setting the future goals of your research.

Johanna Björkroth  
Vice-Rector  
Chair of the Steering Group of the Evaluation

**Steering Group of the evaluation**  
Steering group, nominated by the Rector of the University, was responsible for the planning of the evaluation and its implementation having altogether 22 meetings between February 2010 and March 2012.

**Chair**  
Vice-Rector, professor *Johanna Björkroth*

**Vice-Chair**  
Professor *Marja Airaksinen*

Chief Information Specialist, Dr *Maria Forsman*  
Professor *Arto Mustajoki*  
University Lecturer, Dr *Kirsi Pyhältö*  
Director of Strategic Planning and Development, Dr *Ossi Tuomi*  
Doctoral candidate, MSocSc *Jussi Vauhkonen*
Panel members

CHAIR
Professor Hebe Vessuri
Social anthropology
Venezuelan Institute of Scientific Research, Venezuela

VICE-CHAIR
Professor Christine Helm
Psychology, neurobiology of early-life stress, depression, anxiety, functional somatic disorders
Charité University Medicine Berlin, Germany

Professor Allen Ketcham
Ethics and social philosophy, applied Social philosophy, ethics of business
Texas A&M University – Kingsville, USA

Professor Erno Lehtinen
Education, educational reform
University of Turku, Finland

Professor Enzo Mingione
Urban sociology
University of Milan - Bicocca, Italy

Professor Giovanna Procacci
Political sociology, transformation of citizenship, social rights, social exclusion, immigration policy
University of Milan, Italy

Professor Inger Johanne Sand
Law, public law, legal theory
University of Oslo, Norway

Professor Timo Teräsvirta
Time series econometrics
Aarhus University, Denmark

Professor Göran Therborn
General sociology
University of Cambridge, Great Britain

Professor Liisa Uusitalo
Consumer behaviour (economic & social theory), marketing and communication research
Aalto University, School of Economics, Finland

The panel, independently, evaluated all the submitted material and was responsible for the feedback of the RC-specific reports. The panel members were asked to confirm whether they had any conflict of interests with the RCs. If this was the case, the panel members disqualified themselves in discussion and report writing.

Added expertise to the evaluation was contributed by two members from the Panel of Humanities.

Experts from the Panel of Humanities
Professor Erhard Hinrichs
Professor Pauline von Bonsdorff
EVALUATION OFFICE
Dr Seppo Saari, Doc., Senior Adviser in Evaluation, was responsible for the entire evaluation, its planning and implementation and acted as an Editor-in-chief of the reports.

Dr Eeva Sievi, Doc., Adviser, was responsible for the registration and evaluation material compilations for the panellists. She worked in the evaluation office from August 2010 to July 2011.

MSocSc Paula Ranne, Planning Officer, was responsible for organising the panel meetings and all the other practical issues like agreements and fees and editing a part the RC-specific reports. She worked in the evaluation office from March 2011 to January 2012.

Mr Antti Moliainen, Project Secretary, was responsible for editing the reports. He worked in the evaluation office from January 2012 to April 2012.

TUHAT OFFICE
Provision of the publication and other scientific activity data
Mrs Alja Kaltera, Project Manager of TUHAT-RIS served the project ex officio providing the evaluation project with the updated information from TUHAT-RIS. The TUHAT office assisted in mapping the publications with CWTS/University of Leiden.

MA Liisa Ekebom, Assisting Officer, served in TUHAT-RIS updating the publications for the evaluation. She also assisted the UH/Library analyses.

BA Liisa Jäppinen, Assisting Officer, served in TUHAT-RIS updating the publications for the evaluation.

HELSINKI UNIVERSITY LIBRARY
Provision of the publication analyses
Dr Maria Forsman, Chief Information Specialist in the Helsinki University Library, managed with her 10 colleagues the bibliometric analyses in humanities, social sciences and in other fields of sciences where CWTS analyses were not applicable.
Acronyms and abbreviations applied in the report

External competitive funding
AF – Academy of Finland
TEKES - Finnish Funding Agency for Technology and Innovation
EU - European Union
ERC - European Research Council
International and national foundations
FP7/6 etc. /Framework Programmes/Funding of European Commission

Evaluation marks
Outstanding (5)
Excellent (4)
Very Good (3)
Good (2)
Sufficient (1)

Abbreviations of Bibliometric Indicators
P - Number of publications
TCS – Total number of citations
MCS - Number of citations per publication, excluding self-citations
PNC - Percentage of uncited publications
MNCS - Field-normalized number of citations per publication
MNJS - Field-normalized average journal impact
THCP10 - Field-normalized proportion highly cited publications (top 10%)
INT_COV - Internal coverage, the average amount of references covered by the WoS
WoS – Thomson Reuters Web of Science Databases

Participation category
Category 1. The research of the participating community represents the international cutting edge in its field.
Category 2. The research of the participating community is of high quality, but the community in its present composition has yet to achieve strong international recognition or a clear break-through.
Category 3. The research of the participating community is distinct from mainstream research, and the special features of the research tradition in the field must be considered in the evaluation.
Category 4. The research of the participating community represents an innovative opening.
Category 5. The research of the participating community has a highly significant societal impact.

Research focus areas of the University of Helsinki
Focus area 1: The basic structure, materials and natural resources of the physical world
Focus area 2: The basic structure of life
Focus area 3: The changing environment – clean water
Focus area 4: The thinking and learning human being
Focus area 5: Welfare and safety
Focus area 6: Clinical research
Focus area 7: Precise reasoning
Focus area 8: Language and culture
Focus area 9: Social justice
Focus area 10: Globalisation and social change
1 Introduction to the Evaluation

1.1 RC-specific evaluation reports

The participants in the evaluation of research and doctoral training were Researcher Communities (hereafter referred to as the RC). The RC refers to the group of researchers who registered together in the evaluation of their research and doctoral training. Preconditions in forming RCs were stated in the Guidelines for the Participating Researcher Communities. The RCs defined themselves whether their compositions should be considered well-established or new.

It is essential to emphasise that the evaluation combines both meta-evaluation¹ and traditional research assessment exercise and its focus is both on the research outcomes and procedures associated with research and doctoral training. The approach to the evaluation is enhancement-led where self-evaluation constituted the main information. The answers to the evaluation questions formed together with the information of publications and other scientific activities an entity that was to be reviewed as a whole.

The present evaluation recognizes and justifies the diversity of research practices and publication traditions. Traditional Research Assessment Exercises do not necessarily value high quality research with low volumes or research distinct from mainstream research. It is challenging to expose the diversity of research to fair comparison. To understand the essence of different research practices and to do justice to their diversity was one of the main challenges of the present evaluation method. Understanding the divergent starting points of the RCs demanded sensitivity from the evaluators.

1.2 Aims and objectives in the evaluation

The aims of the evaluation are as follows:

- to improve the level of research and doctoral training at the University of Helsinki and to raise their international profile in accordance with the University’s strategic policies. The improvement of doctoral training should be compared to the University’s policy.²
- to enhance the research conducted at the University by taking into account the diversity, originality, multidisciplinary nature, success and field-specificity,
- to recognize the conditions and prerequisites under which excellent, original and high-impact research is carried out,
- to offer the academic community the opportunity to receive topical and versatile international peer feedback,
- to better recognize the University’s research potential.
- to exploit the University’s TUHAT research information system to enable transparency of publishing activities and in the production of reliable, comparable data.

1.3 Evaluation method

The evaluation can be considered as an enhancement-led evaluation. Instead of ranking, the main aim is to provide useful information for the enhancement of research and doctoral training of the participating RCs. The comparison should take into account each field of science and acknowledge their special character.

¹ The panellists did not read research reports or abstracts but instead, they evaluated answers to the evaluation questions, tables and compilations of publications, other scientific activities, bibliometrics or comparable analyses.
² Policies on doctoral degrees and other postgraduate degrees at the University of Helsinki.
The comparison produced information about the present status and factors that have lead to success. Also challenges in the operations and outcomes were recognized.

The evaluation approach has been designed to recognize better the significance and specific nature of researcher communities and research areas in the multidisciplinary top-level university. Furthermore, one of the aims of the evaluation is to bring to light those evaluation aspects that differ from the prevalent ones. Thus the views of various fields of research can be described and research arising from various starting points understood better. The doctoral training is integrated into the evaluation as a natural component related to research. Operational processes of doctoral training are being examined in the evaluation.

**Five stages of the evaluation method were:**
1. Registration – Stage 1
2. Self-evaluation – Stage 2
3. TUHAT\(^3\) compilations on publications and other scientific activities\(^4\)
4. External evaluation
5. Public reporting

### 1.4 Implementation of the external evaluation

**Five Evaluation Panels**

Five evaluation panels consisted of independent, renowned and highly respected experts. The main domains of the panels are:

1. biological, agricultural and veterinary sciences
2. medicine, biomedicine and health sciences
3. natural sciences
4. humanities
5. social sciences

The University invited 10 renowned scientists to act as chairs or vice-chairs of the five panels based on the suggestions of faculties and independent institutes. Besides leading the work of the panel, an additional role of the chairs was to discuss with other panel chairs in order to adopt a broadly similar approach. The panel chairs and vice-chairs had a pre-meeting on 27 May 2011 in Amsterdam.

The panel compositions were nominated by the Rector of the University 27 April 2011. The participating RCs suggested the panel members. The total number of panel members was 50. The reason for a smaller number of panelists as compared to the previous evaluations was the character of the evaluation as a meta-evaluation. The panelists did not read research reports or abstracts but instead, they evaluated answers to the evaluation questions, tables and compilations of publications, other scientific activities, bibliometrics and comparable analyses.

The panel meetings were held in Helsinki:

- On 11–13 September 2011: (1) biological, agricultural and veterinary sciences, (2) medicine, biomedicine and health sciences and (3) natural sciences.
- On 18–20 September 2011: (4) humanities and (5) social sciences.

\(^3\) TUHAT (acronym) of Research Information System (RIS) of the University of Helsinki  
\(^4\) Supervision of thesis, prizes and awards, editorial work and peer reviews, participation in committees, boards and networks and public appearances.
1.5 Evaluation material

The main material in the evaluation was the RCs' self-evaluations that were qualitative in character and allowed the RCs to choose what was important to mention or emphasise and what was left unmentioned.

The present evaluation is exceptional at least in the Finnish context because it is based on both the evaluation documentation (self-evaluation questions, publications and other scientific activities) and the bibliometric reports. All documents were delivered to the panellists for examination.

Traditional bibliometrics can be reasonably done mainly in medicine, biosciences and natural sciences when using the Web of Science database, for example. Bibliometrics, provided by CWTS/The Centre for Science and Technology Studies, University of Leiden, cover only the publications that include WoS identification in the TUHAT-RIS.

Traditional bibliometrics are seldom relevant in humanities and social sciences because the international comparable databases do not store every type of high quality research publications, such as books and monographs and scientific journals in other languages than English. The Helsinki University Library has done analysis to the RCs, if their publications were not well represented in the Web of Science databases (RCs should have at least 50 publications and internal coverage of publications more than 40%) – it meant 58 RCs. The bibliometric material for the evaluation panels was available in June 2011. The RC-specific bibliometric reports are attached at the end of each report.

The panels were provided with the evaluation material and all other necessary background information, such as the basic information about the University of Helsinki and the Finnish higher education system.

---

**Evaluation material**

1. Registration documents of the RCs for the background information
2. Self evaluation material – answers to the evaluation questions
3. Publications and other scientific activities based on the TUHAT RIS:
   - 3.1. statistics of publications
   - 3.2. list of publications
   - 3.3. statistics of other scientific activities
   - 3.4. list of other scientific activities
4. Bibliometrics and comparable analyses:
   - 4.1. Analyses of publications based on the verification of TUHAT-RIS publications with the Web of Science publications (CWTS/University of Leiden)
   - 4.2. Publication statistics analysed by the Helsinki University Library - mainly for humanities and social sciences
5. University level survey on doctoral training (August 2011)
6. University level analysis on publications 2005–2010 (August 2011) provided by CWTS/University of Leiden

- [Evaluation of the Finnish National Innovation System](https://www.sfs.riista.kaakkois.fi)
- The State and Quality of Scientific Research in Finland, Publication of the Academy of Finland 9/09.

The evaluation panels were provided also with other relevant material on request before the meetings in Helsinki.
1.6 Evaluation questions and material

The participating RCs answered the following evaluation questions which are presented according to the evaluation form. In addition, TUHAT RIS was used to provide the additional material as explained. For giving the feedback to the RCs, the panellists received the evaluation feedback form constructed in line with the evaluation questions:

1. Focus and quality of the RC’s research
   - Description of
     - the RC’s research focus.
     - the quality of the RC’s research (incl. key research questions and results)
     - the scientific significance of the RC’s research in the research field(s)
   - Identification of the ways to strengthen the focus and improve the quality of the RC’s research

The additional material: TUHAT compilation of the RC’s publications, analysis of the RC’s publications data (provided by University of Leiden and the Helsinki University Library)
A written feedback from the aspects of: scientific quality, scientific significance, societal impact, innovativeness
   - Strengths
   - Areas of development
   - Other remarks
   - Recommendations

Numeric evaluation: OUTSTANDING (5), EXCELLENT (4), VERY GOOD (3), GOOD (2), SUFFICIENT (1)

2. Practises and quality of doctoral training
   - Organising of the doctoral training in the RC. Description of the RC’s principles for:
     - recruitment and selection of doctoral candidates
     - supervision of doctoral candidates
     - collaboration with faculties, departments/institutes, and potential graduate schools/doctoral programmes
     - good practises and quality assurance in doctoral training
     - assuring of good career perspectives for the doctoral candidates/fresh doctorates
   - Identification of the RC’s strengths and challenges related to the practises and quality of doctoral training, and the actions planned for their development.

The additional material: TUHAT compilation of the RC’s other scientific activities/supervision of doctoral dissertations
A written feedback from the aspects of: processes and good practices related to leadership and management
   - Strengths
   - Areas of development
   - Other remarks
   - Recommendations

Numeric evaluation: OUTSTANDING (5), EXCELLENT (4), VERY GOOD (3), GOOD (2), SUFFICIENT (1)

3. The societal impact of research and doctoral training
   - Description on how the RC interacts with and contributes to the society (collaboration with public, private and/or 3rd sector).
   - Identification of the ways to strengthen the societal impact of the RC’s research and doctoral training.

The additional material: TUHAT compilation of the RC’s other scientific activities.
A written feedback from the aspects of: societal impact, national and international collaboration, innovativeness
   - Strengths
   - Areas of development
   - Other remarks
   - Recommendations

Numeric evaluation: OUTSTANDING (5), EXCELLENT (4), VERY GOOD (3), GOOD (2), SUFFICIENT (1)
4. International and national (incl. intersectoral) research collaboration and researcher mobility
   - Description of
     - the RC’s research collaborations and joint doctoral training activities
     - how the RC has promoted researcher mobility
   - Identification of the RC’s strengths and challenges related to research collaboration and
     researcher mobility, and the actions planned for their development.
A written feedback from the aspects of: scientific quality, national and international collaboration
   - Strengths
   - Areas of development
   - Other remarks
   - Recommendations

Numeric evaluation: OUTSTANDING (5), EXCELLENT (4), VERY GOOD (3), GOOD (2), SUFFICIENT (1)

5. Operational conditions
   - Description of the operational conditions in the RC’s research environment (e.g. research
     infrastructure, balance between research and teaching duties).
   - Identification of the RC’s strengths and challenges related to operational conditions, and the
     actions planned for their development.
A written feedback from the aspects of: processes and good practices related to leadership and
management
   - Strengths
   - Areas of development
   - Other remarks
   - Recommendations

6. Leadership and management in the researcher community
   - Description of
     - the execution and processes of leadership in the RC
     - how the management-related responsibilities and roles are distributed in the RC
     - how the leadership- and management-related processes support
       - high quality research
       - collaboration between principal investigators and other researchers in the RC
       - the RC’s research focus
       - strengthening of the RC’s know-how
     - Identification of the RC’s strengths and challenges related to leadership and management, and
       the actions planned for developing the processes

7. External competitive funding of the RC
   - The RCs were asked to provide information of such external competitive funding, where:
     - the funding decisions have been made during 1.1.2005-31.12.2010, and
     - the administrator of the funding is/has been the University of Helsinki
   - On the e-form the RCs were asked to provide:
     1) The relevant funding source(s) from a given list (Academy of Finland/Research Council, TEKES/The
        Finnish Funding Agency for Technology and Innovation, EU, ERC, foundations, other national funding
        organisations, other international funding organisations), and
     2)The total sum of funding which the organisation in question had decided to allocate to the RCs

Competitive funding reported in the text is also to be considered when evaluating this point.
A written feedback from the aspects of: scientific quality, scientific significance, societal impact,
innovativeness, future significance
   - Strengths
   - Areas of development
   - Other remarks
   - Recommendations

8. The RC’s strategic action plan for 2011–2013
   - RC’s description of their future perspectives in relation to research and doctoral training.
A written feedback from the aspects of: scientific quality, scientific significance, societal impact, processes
and good practices related to leadership and management, national and international collaboration,
innovativeness, future significance
   - Strengths
   - Areas of development
9. Evaluation of the category of the RC in the context of entity of the evaluation material (1-8)

The RC’s fitness to the chosen participation category
A written feedback evaluating the RC’s fitness to the chosen participation category
- Strengths
- Areas of development
- Other remarks
- Recommendations

Numeric evaluation: OUTSTANDING (5), EXCELLENT (4), VERY GOOD (3), GOOD (2), SUFFICIENT (1)

10. Short description of how the RC members contributed the compilation of the stage 2 material
Comments on the compilation of evaluation material

11. How the Uh’s focus areas are presented in the RC’s research?
Comments if applicable

12. RC-specific main recommendations based on the previous questions 1-11

13. RC-specific conclusions

1.7 Evaluation criteria

The panellists were expected to give evaluative and analytical feedback to each evaluation question according to their aspects in order to describe and justify the quality of the submitted material. In addition, the evaluation feedback was asked to be pointed out the level of the performance according to the following classifications:
- outstanding (5)
- excellent (4)
- very good (3)
- good (2)
- sufficient (1)

Evaluation according to the criteria was to be made with thorough consideration of the entire evaluation material of the RC in question. Finally, in questions 1-4 and 9, the panellists were expected to classify their written feedback into one of the provided levels (the levels included respective descriptions, ‘criteria’). Some panels used decimals in marks. The descriptive level was interpreted according to the integers and not rounding up the decimals by the editors.

Description of criteria levels

Question 1 – FOCUS AND QUALITY OF THE RC’S RESEARCH

Classification: Criteria (level of procedures and results)

Outstanding quality of procedures and results (5)
Outstandingly strong research, also from international perspective. Attracts great international interest with a wide impact, including publications in leading journals and/or monographs published by leading international publishing houses. The research has world leading qualities. The research focus, key research questions scientific significance, societal impact and innovativeness are of outstanding quality.

In cases where the research is of a national character and, in the judgement of the evaluators, should remain so, the concepts of “international attention” or “international impact” etc. in the grading criteria above may be replaced by “international comparability”.

10
Operations and procedures are of outstanding quality, transparent and shared in the community. The improvement of research and other efforts are documented and operations and practices are in alignment with the documentation. The ambition to develop the community together is of outstanding quality.

Excellent quality of procedures and results (4)

Research of excellent quality. Typically published with great impact, also internationally. Without doubt, the research has a leading position in its field in Finland.

Operations and procedures are of excellent quality, transparent and shared in the community. The improvement of research and other efforts are documented and operations and practices are to large extent in alignment with the documentation. The ambition to develop the community together is of excellent quality.

Very good quality of procedures and results (3)

The research is of such very good quality that it attracts wide national and international attention.

Operations and procedures are of very good quality, transparent and shared in the community. The improvement of research and other efforts are documented and operations and practices are to large extent in alignment with the documentation. The ambition to develop the community together is of very good quality.

Good quality of procedures and results (2)

Good research attracting mainly national attention but possessing international potential, extraordinarily high relevance may motivate good research.

Operations and procedures are of good quality, shared occasionally in the community. The improvement of research and other efforts are occasionally documented and operations and practices are to large extent in alignment with the documentation. The ambition to develop the community together is of good quality.

Sufficient quality of procedures and results (1)

In some cases the research is insufficient and reports do not gain wide circulation or do not have national or international attention. Research activities should be revised.

Operations and procedures are of sufficient quality, shared occasionally in the community. The improvement of research and other efforts are occasionally documented and operations and practices are to some extent in alignment with the documentation. The ambition to develop the community together is of sufficient quality.

Question 2 – DOCTORAL TRAINING  
Question 3 – SOCIETAL IMPACT  
Question 4 – COLLABORATION

Classification: Criteria (level of procedures and results)

Outstanding quality of procedures and results (5)

Procedures are of outstanding quality, transparent and shared in the community. The practices and quality of doctoral training/societal impact/international and national collaboration/leadership and management are documented and operations and practices are in alignment with the documentation. The ambition to develop the community together is of outstanding quality. The procedures and results are regularly evaluated and the feedback has an effect on the planning.

Excellent quality of procedures and results (4)

Procedures are of excellent quality, transparent and shared in the community. The practices and quality of doctoral training/societal impact/international and national collaboration/leadership and management are documented and operations and practices are to large extent in alignment with the documentation. The ambition to develop the community together is of excellent quality. The procedures and outcomes are evaluated and the feedback has an effect on the planning.

Very good quality of procedures and results (3)

Procedures are of very good quality, transparent and shared in the community. The practices and quality of doctoral training/societal impact/international and national collaboration/leadership and
management are documented and operations and practices are to large extent in alignment with the documentation. The ambition to develop the community together is of very good quality.

Good quality of procedures and results (2)

Procedures are of good quality, shared occasionally in the community. The practices and quality of doctoral training/societal impact/international and national collaboration/leadership and management are documented and operations and practices are to large extent in alignment with the documentation. The ambition to develop the community together is of good quality.

Sufficient quality of procedures and results (1)

Procedures are of sufficient quality, transparent and shared in the community. The practices and quality of doctoral training/societal impact/international and national collaboration/leadership and management are occasionally documented and operations and practices are to some extent in alignment with the documentation. The ambition to develop the community together is of sufficient quality.

Question 9 – CATEGORY

Participation category – fitness for the category chosen

The choice and justification for the chosen category below should be reflected in the RC's responses to the evaluation questions 1–8.

1. The research of the participating community represents the international cutting edge in its field.
2. The research of the participating community is of high quality, but the community in its present composition has yet to achieve strong international recognition or a clear break-through.
3. The research of the participating community is distinct from mainstream research, and the special features of the research tradition in the field must be considered in the evaluation. The research is of high quality and has great significance and impact in its field. However, the generally used research evaluation methods do not necessarily shed sufficient light on the merits of the research.
4. The research of the participating community represents an innovative opening. A new opening can be an innovative combination of research fields, or it can be proven to have a special social, national or international demand or other significance. Even if the researcher community in its present composition has yet to obtain proof of international success, its members can produce convincing evidence of the high level of their previous research.
5. The research of the participating community has a highly significant societal impact. The participating researcher community is able to justify the high social significance of its research. The research may relate to national legislation, media visibility or participation in social debate, or other activities promoting social development and human welfare. In addition to having societal impact, the research must be of a high standard.

An example of outstanding fitness for category choice (5)

The RC's representation and argumentation for the chosen category were convincing. The RC recognized its real capacity and apparent outcomes in a wider context to the research communities. The specific character of the RC was well-recognized and well stated in the responses. The RC fitted optimally for the category.

- Outstanding (5)
- Excellent (4)
- Very good (3)
- Good (2)
- Sufficient (1)

The above-mentioned definition of outstanding was only an example in order to assist the panellists in the positioning of the classification. There was no exact definition for the category fitness.

---

5 The panels discussed the category fitness and made the final conclusions of the interpretation of it.
1.8 Timetable of the evaluation

The main timetable of the evaluation:

1. Registration November 2010
3. External peer review May–September 2011
4. Published reports March–April 2012
   - University level public report
   - RC specific reports

The entire evaluation was implemented during the university’s strategy period 2010–2012. The preliminary results were available for the planning of the following strategy period in late autumn 2011. The evaluation reports will be published in March/April 2012. More detailed time schedule is published in the University report.

1.9 Evaluation feedback – consensus of the entire panel

The panellists evaluated all the RC-specific material before the meetings in Helsinki and mailed the draft reports to the evaluation office. The latest interim versions were on-line available to all the panellists on the Wiki-sites. In September 2011, in Helsinki the panels discussed the material, revised the first draft reports and decided the final numeric evaluation. After the meetings in Helsinki, the panels continued working and finalised the reports before the end of November 2011. The final RC-specific reports are the consensus of the entire panel.

The evaluation reports were written by the panels independently. During the editing process, the evaluation office requested some clarifications from the panels when necessary. The tone and style in the reports were not harmonized in the editing process. All the reports follow the original texts written by the panels as far as it was possible.

The original evaluation material of the RCs, provided for the panellists is attached at the end of the report. It is essential to notice that the exported lists of publications and other scientific activities depend how the data was stored in the TUHAT-RIS by the RCs.
2 Evaluation feedback

2.1 Focus and quality of the RC’s research

- **Description of**
  - the RC’s research focus
  - the quality of the RC’s research (incl. key research questions and results)
  - the scientific significance of the RC’s research in the research field(s)
- **Identification of the ways to strengthen the focus and improve the quality of the RC’s research**

**ASPECTS:** Scientific quality, scientific significance, societal impact, innovativeness

The focus of NordSoc is the Nordic welfare state, in which it has a recognized leading status as the host of a Nordically funded Nordic Centre of Excellence involving eight universities of the region. Welfare state studies are very strong in all the Nordic countries, and where the cutting edge among them is currently held may be debated, but without doubt NordSoc is an excellent RC. For its large size, 39 doctors, its quantity of publications is not very high, 1.4 (A1, A3, C1) per doctor and year for 2005-10. The bibliographic analysis also places the RC below the field average. Most publications are in scholarly secondary journals or with secondary publishers.

Targeting leading social science journals and publishers is a recommendation.

The RC is composed of three units that collaborate in the CoE NordWel since 2007, a relatively short period of time, which may explain the so far rather modest publication record.

**Numeric evaluation:** 4 (Excellent)

2.2 Practises and quality of doctoral training

- **Organising of the doctoral training in the RC. Description of the RC’s principles for:**
  - recruitment and selection of doctoral candidates
  - supervision of doctoral candidates
  - collaboration with faculties, departments/institutes, and potential graduate schools/doctoral programmes
  - good practises and quality assurance in doctoral training
  - assuring of good career perspectives for the doctoral candidates/fresh doctorates
- **Identification of the RC’s strengths and challenges related to the practises and quality of doctoral training, and the actions planned for their development.**
- **Additional material: TUHAT compilation of the RC’s other scientific activities/supervision of doctoral dissertations**

**ASPECTS:** Processes and good practices related to leadership and management

NordSoc does not have a doctoral program of its own, but “headhunts” doctoral candidates for its research, and provides extra funding and training on top of what is provided by home departments. Presumably this structure is related time-delimited funding of the Nordic Welfare State centre of Excellence.

If the RC could get a more permanent organization, an openly recruited doctoral program in Nordic social studies would provide a new impetus.

Given that most of the RC training activities are linked to the CoE NordWel, a crucial challenge comes from the closing of NordWel by the end of 2012. This makes even more important to structure a permanent autonomous doctoral training program.

**Numeric evaluation:** 3 (Very good)
2.3 The societal impact of research and doctoral training

- Description on how the RC interacts with and contributes to the society (collaboration with public, private and/or 3rd sector).
- Identification of the ways to strengthen the societal impact of the RC’s research and doctoral training.
- Additional material: TUHAT compilation of the RC’s other scientific activities.

ASPECTS: Societal impact, national and international collaboration, innovativeness

NordSoc members, and its CENS constituent unit in particular, participate actively in the many Nordic networks and organizations. In Finland SSKH is well integrated in the Swedish-speaking community. Its Nordic research is communicated to Nordic society.

The RC has a good record of connections with political actors, unions, NGOs and the Finnish media; its members actively participate in the public debate, special attention is given to the involvement of doctoral students in public events.

Numeric evaluation: 4 (Excellent)

2.4 International and national (incl. intersectoral) research collaboration and researcher mobility

- Description of
  - the RC’s research collaborations and joint doctoral training activities
  - how the RC has promoted researcher mobility
- Identification of the RC’s strengths and challenges related to research collaboration and researcher mobility, and the actions planned for their development.

ASPECTS: Scientific quality, national and international collaboration

Two of the constituent units, CENS and SSKH, have developed extensive and regular international exchange, in the case of CENS on an impressive scale. A future challenge is that the third unit, SSH, is a section of a larger department, without much resources of its own, and currently fully dependent on the Nordwel research project which ends in 2012.

Also mobility of researchers is fully dependent on NordWel, a future challenge for the RC is to be able to organize a more permanent mobility program.

Numeric evaluation: 4 (Excellent)

2.5 Operational conditions

- Description of the operational conditions in the RC’s research environment (e.g. research infrastructure, balance between research and teaching duties).
- Identification of the RC’s strengths and challenges related to operational conditions, and the actions planned for their development.

ASPECTS: Processes and good practices related to leadership and management

Setting up NordSoc has been a boost to Nordic studies in Helsinki, although the different character of its three constituent units complicates operations. According to the RC report a cloud of uncertainty hovers over it, with an insecure situation at the so far very successful CENS as well as the ending of the big Nordwel project.

NordWel has provided so far the core platform of RC collaboration and offered a seminar series; in addition to this the three partner units organize regular seminars. It is recommended that more organizational efforts are made for reinforcing collaboration between them.
The RC is aware that a challenge comes from the need to find a sustainable balance between teaching, administrative tasks and international commitment.

2.6 Leadership and management in the researcher community

- **Description of**
  - the execution and processes of leadership in the RC
  - how the management-related responsibilities and roles are distributed in the RC
  - how the leadership- and management-related processes support
    - high quality research
    - collaboration between principal investigators and other researchers in the RC
    - the RC’s research focus
    - strengthening of the RC’s know-how
- **Identification of the RC’s strengths and challenges related to leadership and management, and the actions planned for developing the processes**

**ASPECTS: Processes and good practices related to leadership and management**

As the research is driven by principal investigators of the three constituent units, the loose coordination seems to function well. The Nordwel project has its own management group with representatives of the seven foreign partner institutions.

But this is not the best form of leadership for the challenges of uncertainty ahead.

The RC is aware that the closing of NordWel will be a challenge also from the vantage point of management and institutionalization of collaboration between the three partner units; the plan of creating three permanent senior positions may be a good plan, but from this respect it might not be enough for strengthening collaboration between the partner units.

2.7 External competitive funding of the RC

- **The RCs were asked to provide information of such external competitive funding, where:**
  - the funding decisions have been made during 1.1.2005–31.12.2010, and
  - the administrator of the funding is/has been the University of Helsinki
- **On the e-form the RCs were asked to provide:**
  1) The relevant funding source(s) from a given list (Academy of Finland/Research Council, TEKES/The Finnish Funding Agency for Technology and Innovation, EU, ERC, foundations, other national funding organisations, other international funding organizations), and
  2) The total sum of funding which the organisation in question had decided to allocate to the RCs members during 1.1.2005–31.12.2010.

Competitive funding reported in the text is also to be considered when evaluating this point.

**ASPECTS: Scientific quality, scientific significance, societal impact, innovativeness and future significance**

The RC has a very impressive record of external funding acquisition, from European, Nordic, and national sources.

2.8 The RC’s strategic action plan for 2011–2013

- **RC’s description of their future perspectives in relation to research and doctoral training.**

**ASPECTS: Scientific quality, scientific significance, societal impact, processes and good practices related to leadership and management, national and international collaboration, innovativeness, future significance**
The RC’s strategic plan involves three very good concrete proposals. To get three senior positions for permanenting the collaboration of the three constituent units, to create a common research school in Nordic studies, and to initiate a web platform of Nordic studies in the world.

We think these proposals should be supported by the University and by the Academy of Finland.

There seems to be another matter which the University also should consider. That is the departmental structure. The Centre for Nordic Studies is now part of a Department of World Culture, and the Nordically active researchers of Social Science History are in a Department of Political and Economic Studies. For a more long-term effort at Nordic studies, which the NordSoc experience has shown to be very promising scholarly, the current organizational structure does not look optimal.

2.9 Evaluation of the category of the RC in the context of entity of the evaluation material (1-8)

The RC’s fitness to the chosen participation category.
Category 1. The research of the participating community represents the international cutting edge in its field.

The RC fits rather well into category 1, although its overall, collective publication record is hardly outstanding.

Numeric evaluation: 4 (Excellent)

2.10 Short description of how the RC members contributed the compilation of the stage 2 material

Materials have been discussed through 4 general meetings, where drafts prepared by the RC leaders have been commented. All members have had the opportunity to contribute by email.

2.11 How the UH’s focus areas are presented in the RC’s research

Focus area 9: Social justice

The welfare state focus of NordSoc fits nicely into the focus area of Social Justice.

2.12 RC-specific main recommendations

- Rethink long-term organization
- A more careful publication strategy for enhancing their number and the quality of journals/publishers
- Efforts for building up an autonomous doctoral training program in Nordic social studies
- A more permanent structural strategy of mobility for researchers

2.13 RC-specific conclusions

Being selected as a Nordic Centre of Excellence is a great achievement of this RC, which should be followed up by an excellent publication record. What has been achieved and shown so far could also provide the basis for a broader research Centre of Nordic Studies at Helsinki University, e.g. as a temporary long-term program, for, say, ten years.
3 Appendices

A. Original evaluation material
   a. Registration material – Stage 1
   b. Answers to evaluation questions – Stage 2
   c. List of publications
   d. List of other scientific activities

B. Bibliometric analyses
   a. Analysis provided by CWTS/University of Leiden
   b. Analysis provided by Helsinki University Library (66 RCs)
RC-SPECIFIC MATERIAL FOR THE PEER REVIEW

NAME OF THE RESEARCHER COMMUNITY:
The Nordic Society in Cross-disciplinary and Transnational Perspectives (NordSoc)

LEADER OF THE RESEARCHER COMMUNITY:
Professor Pauli Kettunen, Department of Political and Economic Studies, Section of Social Science History

RC-SPECIFIC MATERIAL FOR THE PEER REVIEW:

- Material submitted by the RC at stages 1 and 2 of the evaluation
  - STAGE 1 material: RC’s registration form (incl. list of RC participants in an excel table)
  - STAGE 2 material: RC’s answers to evaluation questions
- TUHAT compilations of the RC members' other scientific activities 1.1.2005-31.12.2010

NB! Since Web of Science (WoS)-based bibliometrics does not provide representative results for most RCs representing humanities, social sciences and computer sciences, the publications of these RCs will be analyzed by the UH Library (results available by the end of June, 2011)
INTERNATIONAL EVALUATION OF RESEARCH AND DOCTORAL TRAINING AT THE UNIVERSITY OF HELSINKI

RC-SPECIFIC STAGE 1 MATERIAL (registration form)

1 RESPONSIBLE PERSON

Name: Kettunen, Pauli
E-mail:
Phone: 050 4155403
Affiliation: Department of Political and Economic Studies, Section of Social Science History
Street address: Snellmaninkatu 14 A

2 DESCRIPTION OF THE PARTICIPATING RESEARCHER COMMUNITY (RC)

Name of the participating RC (max. 30 characters): The Nordic Society in Cross-disciplinary and Transnational Perspectives
Acronym for the participating RC (max. 10 characters): NordSoc
Description of the operational basis in 2005-2010 (eg. research collaboration, joint doctoral training activities) on which the RC was formed (MAX. 2200 characters with spaces): NordSoc is based on collaboration between the Centre for Nordic Studies (CENS, Dept of World Cultures), the Section of Social Science History (SSH, Dept of Political and Economic Studies), and the Swedish School of Social Science (SSKH).

The three institutes are cooperating as the host of the Nordic Centre of Excellence The Nordic Welfare State - Historical Foundations and Future Challenges (NordWel). It is a research and researcher training enterprise of eight Nordic universities, funded by NordForsk (2007–2012) and led by Pauli Kettunen (Social Science History). Each of the three institutes host a number of interlinked research projects, in which political, cultural, social and economic aspects of the Nordic societies are examined from a cross-disciplinary and transnational perspective.

CENS, led by Henrik Stenius, is an important broker of research projects, networks and training. It has been successful in attracting external funding and a significant number of foreign scholars. Its major projects include the FiDiPro Chair of Bo Stråth, who is in charge of research on the Nordic societies in a European and global context, most notably of a large project funded by European Research Council.

SSH is the unit of political history and economic and social history at the Faculty of Social Sciences. It focuses on the research in the welfare state, work and labour market. This has been recognized and fostered by its status as the coordinating institute of NordWel, in which its research projects participating in the RC are integrated.
INTERNATIONAL EVALUATION OF RESEARCH AND DOCTORAL TRAINING AT THE UNIVERSITY OF HELSINKI

RC-SPECIFIC STAGE 1 MATERIAL (registration form)

At the SSKH, Helena Blomberg-Kroll is in charge of research in the values and legitimacy of the Nordic welfare state, funded by the Academy of Finland and European Science Foundation. The topics of participating researchers at this institute focus on social policies, gender and immigration and their intersections.

NordSoc brings together researchers from political, economic and social history, sociology, social policy, political science and philosophy in collaboration on cutting edge cross-disciplinary research, and internationally competitive researcher training and research mobility.

3 SCIENTIFIC FIELDS OF THE RC

Main scientific field of the RC’s research: social sciences
RC’s scientific subfield 1: History
RC’s scientific subfield 2: Social Sciences, Interdisciplinary
RC’s scientific subfield 3: Political Science
RC’s scientific subfield 4: Industrial Relations and Labor
Other, if not in the list:

4 RC’S PARTICIPATION CATEGORY

Participation category: 1. Research of the participating community represents the international cutting edge in its field

Justification for the selected participation category (MAX. 2200 characters with spaces): Representing international cutting edge research is the main criterion for the funding given to the NCoE NordWel and to the FIDiPro and ERC project of Bo Stråth. Consequently, the RC as a whole should also be evaluated on that basis. Moreover, the fact that the cooperating institutes have proved competitive in raising external funding both nationally and internationally is a sign of the high standard of the RC.

5 DESCRIPTION OF THE RC’S RESEARCH AND DOCTORAL TRAINING

Public description of the RC’s research and doctoral training (MAX. 2200 characters with spaces): NordSoc investigates the political, cultural, social and economic aspects of the Nordic societies from a cross-disciplinary and transnational perspective. NordSoc is based on collaboration between the Centre for Nordic Studies (CENS, Dept of World Cultures), the Section of Social Science History (SSH, Dept of Economic and Political Studies), and the Swedish School of Social Science (SSKH).

At CENS, the cultural, regional and ideological factors that make the Nordic countries Nordic are topical. The RC’s research at SSH focuses on the welfare state, work and labour market. At SSKH focus is on the legitimacy of the welfare state and on the consequences of social policy transformations.
NordSoc researchers are the core of the Nordic CoE NordWel, coordinated in SSH, funded by the CoE programme of NordForsk. Members of NordSoc do also research on consensual politics, on Nordic welfare attitudes in a changing Europe as well as on national constitutions and global law in a way that enables the RC to examine the Nordic society in both European and global perspectives. For these themes RC members have received significant European funding (ERC, ESF, FP5, FP7).

On national level, the members of the RC have received funding from all top level instruments: FiDiPro programme, CoE programme and Academy Professorship of the Academy of Finland. In addition, NordSoc is currently hosting or collaborating as a central partner in four research projects funded by the Academy.

Researcher training is conducted in close cooperation with the research projects. NordWel organises annually an international summer school and several researcher training seminars in all Nordic countries. Its mobility fellowship scheme is aimed at researcher career promotion. CENS has its own training scheme funded by the UH. In addition, CENS is an organising partner in an international research school in conceptual history, conceptual analysis and political thought that organises an annual summer school, as well as several thematic research training courses.

**Significance of the RC’s research and doctoral training for the University of Helsinki (MAX. 2200 characters with spaces):** By developing and pursuing its research agenda, the RC has contributed to top-level scholarly debates and public discussion on global transformations and Nordic societies. Its activities in research, researcher training and the promotion of researcher career and mobility are clearly compatible with the strategic emphases of the UH. The projects of the RC have been fruitfully integrated in research, doctoral training and teaching of their host institutes.

CENS is the only research unit within the Nordic countries that specialises on Nordic experiences. It has in a short period of time established itself as an important actor in the international academic field, responding to a need within many academic disciplines to thematize their research within a multidisciplinary and comparative Nordic framework.

In general, the RC has created flexible forms of cooperation, both within UH and internationally, that genuinely benefit all partners. It has been able to raise funding for these networks and projects not least due to its conscious ambition to collaborate with the highest international expertise, thus contributing significantly to the reputation and branding of UH both domestically and internationally. The foreign affiliated researchers are not merely guests or cooperation partners, but genuinely involved in the operation of the networks and projects. Moreover, by giving great responsibility to young scholars, the RC has made the development of complementary competences such international networking skills a central part of its doctoral training.
INTERNATIONAL EVALUATION OF RESEARCH AND DOCTORAL TRAINING AT THE UNIVERSITY OF HELSINKI

RC-SPECIFIC STAGE 1 MATERIAL (registration form)

Keywords: Nordic countries, Europe, globalization, history, politics, political culture, conceptual history, constitution, democracy, civil society, participation, welfare state, social policy, economic policy, labour market, work, gender, identity, legitimacy, attitudes, cross-disciplinarity, comparative research, transnationality

6 QUALITY OF RC’S RESEARCH AND DOCTORAL TRAINING

Justified estimate of the quality of the RC’s research and doctoral training at national and international level during 2005-2010 (MAX. 2200 characters with spaces): The cooperating institutes have proved competitive in raising research funding both nationally and internationally, which is a sign of the high standard of the RC. Excellent scientific quality internationally is the main criterion for the funding of the Nordic CoE and the FiDiPro and ERC projects that are hosted by the RC.

According to the Mid-Term Evaluation run by NordForsk (March 2010), NordWel has reached its high scientific ambitions and produced internationally high quality research. NordWel has also, according to the evaluation, done an excellent job of facilitating contacts among leading researchers based in the five different Nordic countries. The added value of NordWel has been that it has brought the Nordic experience to the attention of broader international (i.e., non-Nordic) audiences. In terms of researcher training, the interdisciplinary and international orientation of the summer schools, courses and seminars implies a very strong long term investment that will guarantee the pre-eminence of Nordic comparative research into the future.

In the field of conceptual history CENS has become a recognised leading international centre, and organises an annual international summer school in conceptual history within the framework of CONCEPTA. CENS participates in the Finnish CoE Political Thought and Conceptual History. The ERC Project and the FiDiPro Chair hosted at CENS indicate the RC’s capability to international cutting edge research.

Comments on how the RC’s scientific productivity and doctoral training should be evaluated (MAX. 2200 characters with spaces): The evaluation should be cross-disciplinary and take into account the role of historical perspective for the RC as a core element of cross-disciplinarity. At the same time, the assessment should be sensitive to the traditions of the disciplines represented in the RC. One should also recognise that these topics, and the quest for societal relevance, necessitate publishing also in other languages than English.

In addition to the criteria concerning the quality of the scientific output, we wish to point out two features of the RC that merit attention. Firstly, particularly CENS has as its task to facilitate and broker research. It should therefore be judged on the basis of its success in establishing and raising funding for research projects and networks, and in developing forms of collaboration that affiliate researchers to CENS and UH. Secondly, being the only top-level researcher community of its field in Nordic universities, NordSoc has a responsibility in presenting
Nordic social and political experiences in international arenas. How well the RC has achieved its goals in this respect should be assessed.

INTERNATIONAL EVALUATION OF RESEARCH AND DOCTORAL TRAINING AT THE UNIVERSITY OF HELSINKI

RC-SPECIFIC STAGE 2 MATERIAL

BACKGROUND INFORMATION

Name of the RC’s responsible person: Kettunen, Pauli
E-mail of the RC’s responsible person:
Name and acronym of the participating RC: The Nordic Society in Cross-disciplinary and Transnational Perspectives, NordSoc
The RC’s research represents the following key focus area of UH: 9. Yhteiskunnan oikeudenmukaisuus – Social Justice
Comments for selecting/not selecting the key focus area: The definition of the key focus area "Social justice" explicitly mentions “the Nordic welfare society”, which is a major cross-cutting and interlinking theme in the RC. The profile of the RC also includes many topics associated with other key focus areas, especially “Globalization and social change”.

1 FOCUS AND QUALITY OF RC’S RESEARCH (MAX. 8800 CHARACTERS WITH SPACES)

- Description of the RC’s research focus, the quality of the RC’s research (incl. key research questions and results) and the scientific significance of the RC’s research for the research field(s).

International political and scholarly interest in the Nordic countries, their historical experiences, societal arrangements, cultural voicing and political conduct is increasing. Much attention is paid, especially, to the welfare state, international relations, juridical traditions and education. Yet, it is paradoxical that within the Nordic countries there are very few scholarly environments that focus on Norden.

NordSoc gathers scholars that examine Norden by raising questions on political culture, intellectual history and welfare politics. Researchers from political, economic and social history, sociology, social policy, political science, intellectual history and philosophy collaborate on cutting edge cross-disciplinary research, and internationally competitive researcher training and mobility.

The collaborating units contribute to the RC on the basis of their specific strengths. At Centre for Nordic Studies (CENS), the cultural, regional and ideological factors that make the Nordic countries Nordic are topical. Section of Social Science History (SSH) contributes to the RC by examining the welfare state, labour market and work. At Swedish School of Social Science (SSKH) focus is on the legitimacy of the welfare state and on social policy transformations.

CENS is the only research unit in the Nordic countries that specialises on Nordic experiences. Historical experiences, societal arrangements, cultural voicing and political conduct are approached as fields of tensions and contestation, with agencies striving at different sorts of goals. International comparison and research collaboration is an essential part of every project.

Historical regions, memory policy and identity construction have been major focus areas at CENS. Within the framework of one EU-project, one Academy of Finland project and three Nordic Research Council projects, the researchers have contributed to a re-evaluation of Nordic and European narratives of World War II, examined Nordic co-operation practises, as well as more broadly analysed the interplay between national, regional and global regimes and identities.

In conceptual history CENS has become a recognised leading international centre. It is the prime mover of a project on European conceptual history, aiming in the first phase to publish 7-8 anthologies.
INTERNATIONAL EVALUATION OF RESEARCH AND DOCTORAL TRAINING AT THE UNIVERSITY OF HELSINKI

RC-SPECIFIC STAGE 2 MATERIAL

each focusing on a particular cluster of European key concepts. Through a European Research Council Project and a FIDIPro-professorship (Bo Stråth), CENS strives at positioning the Nordic countries in an international context. Moreover, CENS is a partner of the CoE in Political Thought and Conceptual Change (hosted at University of Jyväskylä), and has hosted several projects in conceptual history (two funded by the Academy of Finland and two by the Kone foundation).

The conceptual history perspective is for many reasons more topical than ever. It provides an alternative approach to teleological interpretations. Acknowledging political and economical asymmetries, conceptual history explores how historical actors in the regions outside the European core areas relate themselves to the hegemonic conceptual universes in the core regions. CENS is cooperating with, for example, scholars from South-East Europe. Focusing on a notion of historical regions the research at CENS contributes to a more balanced and democratic communication within Europe.

At SSH, the RC’s research focuses on the welfare state, work and labour market. Associated with these topics, consensual-corporatist political traditions and varying national policies of European integration have been investigated. Gender perspective plays a crucial role. Research projects with national funding from, especially, the Academy of Finland and the University of Helsinki are integrated in the NCoE NordWel. Preceding NordWel, international research cooperation was fostered, e.g. by an EU funded project on consensual politics in Europe.

In research agenda, transnational economic, political and cultural interdependencies and intercourses are seen constitutive of the national institutions and discourses. It is found important to deconstruct stereotypic images of the Nordic Model and to explore the limits of Nordic welfare universalism. This is only possible by means of careful historical analysis, in which current changes are interpreted in the context of long-term transformations and from a comparative perspective.

Two thematic areas have been prominent in the RC-integrated SSH research: 1) the political economy of the welfare state and 2) the politics of welfare policies. The first field includes the historical forms of coordinated market economy, the questions of taxation, redistribution, inter-generational solidarity, social and educational policies, and the changing forms of household risk management. In the second field, institutional-historical analyses are associated with the examination of the role of expert knowledge, interests and ideas. Here, the focus has been on transnational contexts and comparisons in the shaping of national welfare states, and the “Nordic” complex of welfare state, local self-government, labour market agreements, and gender system.

At the SSKH, the research within the RC has focused on two themes related to the development of the Nordic welfare states: 1) welfare state legitimacy and 2) welfare state professions and labour market issues. In the projects funded by, especially, the Academy of Finland and European Science Foundation, the aim has been to describe, test and enhance general theoretical perspectives on these issues by studying Nordic societal contexts and, thereby, to contribute to social theorizing on work, family and the welfare state and to provide new empirical knowledge of the Nordic societies from an international perspective.

Welfare state legitimacy has been analysed by studies on similarities and differences in political discourses legitimizing various welfare reforms, processes of agenda-setting and power relations in the enactment of recent Nordic welfare state reforms, and public discourses on and among ethnic minorities. Other themes concern factors that explain the perceptions about welfare state legitimacy in the general population, certain high-risk groups, and among local decision makers and groups of welfare state professionals.

The status and conditions of professions and the labour-market in the Nordic welfare state have been explored by examining how recent developments have influenced expert professions, e.g., the
feminization of medicine” and its implications for health care delivery, the interplay between professional practices and child welfare policies, the organization of care work and the division of labour and how this, in turn, reorders occupations and occupational identities, how immigration and globalization transforms the local work-worlds associated with the welfare state, and how roles of trade unions in the regulation of labour markets and working life are changing. Empirical results show increasing contradictions between traditional and new emphases within Nordic welfare policies, leaving welfare state professionals at the centre of conflicts. Considerations of national and sub-national political cultures prove important in order to explain differences between and within the Nordic countries.

The RC has successfully attracted highly competed national, Nordic and European research funding. The results of the mid-term evaluation of NordWel by an international panel in spring 2010 were very positive. International cooperation has significantly contributed to the RC’s high-level international publishing in 2005-2010.

- Ways to strengthen the focus and improve the quality of the RC’s research.

Recognising the fact that talk about Norden as a particular region only makes sense within an international, European and global perspective, the research can only be improved by means of more international cooperation, by involving foreign researchers in our research projects and by ensuring that our own researchers are able to spend time abroad.

Thus, in our view the challenges in the near future are primarily of organizational, structural and resource-related nature, and they will be touched upon in the following.

| 2 Practises and quality of doctoral training (max. 8800 characters with spaces) |

- How is doctoral training organised in the RC? Description of the RC’s principles for recruitment and selection of doctoral candidates, supervision of doctoral candidates, collaboration with faculties, departments/institutes, and potential graduate schools/doctoral programmes, good practises and quality assurance in doctoral training, and assuring good career perspectives for the doctoral candidates/fresh doctorates.

Doctoral candidates are recruited in the RC a) by headhunting in the preparatory phase of research projects, b) in connection with thematic seminars and international summer schools, through which a large number of doctoral candidates with varying forms of funding are integrated in NordSoc research projects, and c) within the framework of NordWel international mobility scheme described in answer 4. Supervision is a crucial responsibility of all senior researchers involved, at the same time as each doctoral candidate has a principal supervisor nominated by the faculty.

Doctoral candidates participate in the postgraduate seminars of their home departments and make use of resources provided by relevant graduate schools such as the national graduate schools in history, in social sciences and in gender studies. The three collaborating units have divergent positions in university organisation, and, correspondingly, in the studies of individual doctoral candidates, the relationship between the specific RC researcher training and the departmental or faculty-based researcher training curricula varies.

CENS is providing research training to NordSoc members through two doctoral programmes both of which have been established during the period of this evaluation. 1) The research training school Européer i Norden och från Norden (EINO) is CENS’s own research training scheme funded by the University of Helsinki. 2) CENS has been the prime mover behind the research training school CONCEPTA
INTERNATIONAL EVALUATION OF RESEARCH AND DOCTORAL TRAINING AT THE UNIVERSITY OF HELSINKI

RC-SPECIFIC STAGE 2 MATERIAL

(http://www.concepta-net.org/), which is an international research school in conceptual history, conceptual analysis and political thought that organises an annual summer school course, as well as several thematic research training courses.

All doctoral students at CENS have a second home, i.e. the institution at which they will defend their thesis, be that in the field of history, philosophy, linguistics or the social sciences. By stressing the importance of nursing the connections with the mother institution and by establishing good cooperation practices with the different institutions, researcher training has played a crucial role in making CENS into a genuinely multidisciplinary environment as well as the hub of a great network within the university.

All three NordSoc units are engaged in the researcher training and researcher career promotion activities of the NCoE NordWel. Doctoral candidates employed in UH-based research projects and the visiting young researchers from other NordWel partner institutes have a regular NordWel-Helsinki seminar, and they actively participate in NordWel researcher training organized at other partner universities (workshops, seminars, summer schools). In the departments and faculties of NordSoc units (Dept of Political and Economic Studies/Faculty of Social Sciences, Dept of World Cultures/Faculty of Humanities, Swedish School of Social Science), NordWel has been recognised and utilised as a provider of top level international research training.

The NordWel policies of research training include:

a) Combining specific research training activities (courses, summer schools) with the effort to create space for PhD students within all research activities. Thus, for example, at all larger NordWel conferences special workshops for young researchers are organized.

b) Providing resources for doctoral student groups “from below”. The first such cross-national group on “Welfare and Migration” was established in 2009.

c) Organizing annual summer schools. The NordWel summer schools have attracted a high number of applicants across disciplines (both within and outside Norden) and a unique group of international top scholars as teachers.

d) Supporting doctoral candidates to present papers and organise sessions at international conferences.

e) Supporting international mobility by the NordWel mobility scheme. Many doctoral candidates of RC units have made 3-12 month visits to other NordWel partner universities.

For all doctoral candidates within the NordWel mobility scheme, a local supervisor at the host institution has been appointed and visiting professors have been active in supervision. Senior members of the RC have consequently served as supervisors to many doctoral students that make their degrees to other departments, universities and countries. For example, RC principal investigators at SSKH have been active in supervision not only in the framework of NordWel but also through their connections with Åbo Akademi University.

The needs of researcher career promotion are consciously taken into account in the composition of research projects. An appropriate balance between researchers at different stages of career has been a major principle, associated with the aim of encouraging a sense of community. By giving great responsibility to young researchers, NordSoc strives at developing complementary competences such as an insight in international publishing and funding strategies. For example, doctoral students at CENS have been responsible of organising research training courses in scientific publishing at the University of Helsinki, thus disseminating their knowledge and expertise to a wider audience. Various research and researcher training activities have been aimed to provide younger researcher with opportunities for
INTERNATIONAL EVALUATION OF RESEARCH AND DOCTORAL TRAINING AT THE UNIVERSITY OF HELSINKI

RC-SPECIFIC STAGE 2 MATERIAL

developing their competencies as active and competitive members of international scholarly community.

- RC’s strengths and challenges related to the practises and quality of doctoral training, and the actions planned for their development.

One of the strengths of the RC’s research training is undoubtedly its great international networks and mobility, and one of the main challenges is to maintain these schemes after the closing of the NordWel at the end of 2012. New initiatives are needed and planned.

In connection with NordWel’s exit strategy, new means are sought for continuing the successful activities such as the international summer school. CENS will improve the collaboration between the European Conceptual History-project and the research training activities within CONCEPTA. One of the crucial objectives in this regard is to detect and analyse particular national or Nordic dimensions in the history of political conceptualisations.

A central ambition of the RC is to establish an institutionalised research training programme. The idea is to initiate an international and multidisciplinary research training school in Nordic studies, organised in collaboration between the three different partners of the RC, hosted and coordinated from CENS. Here CENS can also utilise its experiences with on line teaching.

3 SOCIETAL IMPACT OF RESEARCH AND DOCTORAL TRAINING (MAX. 4400 CHARACTERS WITH SPACES)

- Description of how the RC interacts with and contributes to the society (collaboration with public, private and/or 3rd sector).

Reflections on the societal dimensions of historical and social scientific research have been an important part of theoretical and methodological work in the RC. Historical social research often gains societal relevance through its critical impacts on political agendas and public debates rather than producing knowledge to be directly implemented in practical policies. In any case, results of the RC research projects are in many ways utilised by political actors, public authorities, media, NGOs, enterprises and wider audience.

Many RC members have actively participated in public debates. They have also been widely used by media as experts. By means of seminars and lectures in Studia Generalia series and other adult education institutions, the RC’s ongoing research and new results have been presented to general public. Senior members have been active in research and science policies, having tasks of expertise and evaluation in research-policy and research-funding institutions, learned societies, editorial boards of national and international scientific journals, and expert bodies and steering committees of research projects, conducted by institutions and organisations of public as well as private sector.

Cooperation with sectoral research institutes, public authorities and labour market organisations has been achieved, not least in the framework of NordWel. As an active broker organisation, CENS has good cooperation with all the key Nordic organisations in Helsinki (e.g., NIFin and Pohjola-Norden). In the organizing of joint events, seminars and book launches, doctoral students have been given much responsibility, thus helping them to get experience of coordinating events and to strengthen their networks outside the university.

The RC has also greatly benefited from SSKH’s active role in the national, Nordic and international societal interaction in different policy fields. SSKH is one of the founders of the Swedish-speaking national Center of Excellence of Social Welfare. The shareholders of this centre include Swedish-
speaking and bilingual municipalities in Finland, universities, polytechnics and NGOs. By fostering interaction between education, research and practice, the centre provides a framework for intense cooperation between researchers and practitioners of social welfare. Research at the SSKH is also communicating with wider society through the Board of Cooperation at the SSKH that consists of representatives of ministries, governmental organizations, municipalities, private for and non-profit organizations, and media organizations. Other examples of interaction include contacts with Nordic trade unions: for example research results about the work situation and attitudes of Nordic social workers were recently distributed to Swedish social workers by their trade union in form a special issue of trade union journal.

Successful efforts have been made to develop public dissemination internationally in relation to the RC’s international publications. For example, the book on The Nordic Welfare State, initiated and elaborated in NordWel, was published in Chinese language in May 2010, and there would be many other examples on meeting the international interest in Nordic societal developments and patterns of social reform.

Ways to strengthen the societal impact of the RC’s research and doctoral training.

In terms of public dissemination, the RC’s strengths are the ability to use Nordic languages and good skills in popularizing scientific work. In addition, RC members have good relations with the central actors in the Nordic cooperation, e.g., the Nordic council of ministers. To get the message heard in the media is nowadays a challenge to everybody. One step towards better visibility in this respect is to gather research on Nordic society on the web-platform that the RC plans to open in near future.

All plans for further developing our researcher training include an effort to create competencies needed in researcher career and in the tasks of research-based expertise.

Description of the RC’s research collaborations and joint doctoral training activities and how the RC has promoted researcher mobility.

International collaboration is constitutive of the RC. NordWel is by nature a project for international cooperation in research, research training and researcher mobility. The collaboration of the three institutes in this NCoE since 2007 was facilitated by preceding joint projects and international cross-disciplinary activities, including the EU funded project Smallcons, the Academy of Finland research programme on Social Capital and the research project on Finnish-Swedish connections.

In addition to the NordWel researchers in eight Nordic partner universities, researchers from non-Nordic milieus participate through the visiting fellowships by the NordWel mobility scheme, as students and teachers in NordWel summer school or as participants in other international events. NordWel’s international reference group consists of (mostly non-Nordic) prominent scholars who have importantly contributed to its activities.

Responding to the quest for multidisciplinary and comparative Nordic framework, CENS has in a short period of time established itself as an important actor in the international academic field. A major sign of this success is the FiDiPro-chair of Bo Stråth, which has not only generated several anthologies procreated with the help of seminars and conferences with the highest international expertise, but also several new research projects, such as Between Restoration and Revolution, National Constitutions and
Global Law: an Alternative View on the European Century 1815-1914 (EReRe) which enrols 7 full time researchers recruited from around the world.

CENS has created flexible forms of cooperation, both within UH and internationally, that genuinely benefits all partners. CENS has been able to raise funding for these networks and projects not least due to its conscious ambition to collaborate with the highest international expertise, thus contributing significantly to the reputation and branding of UH both domestically and internationally. One important means by which CENS has succeeded in this, is by strengthening the position of the foreign affiliated researchers, which are not merely guests or cooperation partners, but also economically involved in the operation of the networks and projects of CENS (e.g., in the research projects on Nordic Openness; Progressives; Transnational citizenship; Conceptual history of liberalism and democracy).

SSKH has established a system of International Readers and Visiting Research Fellows (VFR). International Readers participate in both research, teaching and supervision at the SSKH while the aim with VFR:s is e.g. to create new networks and research projects in relevant fields of study. Researchers at SSKH are actively engaged in international cooperation, e.g. with researchers on the impact of gender, practice, work environment and quality of care in American health care in two NIH financed projects in the US (Riska), with researchers on immigration in Canada (Wrede), and with the researchers of popular welfare state legitimacy, most notably in the European Science Foundation’s research programme Cross-national and Multi-level Analysis of Human Values, Institutions and Behaviour, where the application of the SSKH research team (Blomberg, Kroll, Kallio) achieved the top ranking.

RC’s strengths and challenges related to research collaboration and researcher mobility, and the actions planned for their development.

A major challenge for the RC is to maintain the mobility of researchers after the end of the NordWel in 2012. This can only be achieved by means of new international research projects and networks. But there is also a need for a more permanent mobility programme for researchers on different stages of their careers. This may be achieved through the networks established within NordWel in the Nordic countries. New collaboration will be opened towards South-Eastern Europe and China.

The scheme of affiliated researchers will be developed and expanded at CENS. What is important is that the affiliated researcher is committed to a period of several years, with the capacity of representing the RC at international arenas. In a more long-term perspective, the tenure track system of UH may offer new possibilities for recruiting an international scholar on a more permanent basis to Helsinki.

5 Operational conditions (max. 4400 characters with spaces)

- Description of the operational conditions in the RC’s research environment (e.g. research infrastructure, balance between research and teaching duties).

NordSoc is based on collaboration between the Centre for Nordic Studies (CENS, Dept of World Cultures), the Section of Social Science History (SSH, Dept of Economic and Political Studies), and the Swedish School of Social Science (SSKH). CENS is an organizational unit that is involved in its entirety in NordSoc collaboration. At both the SSH and SSKH, NordSoc community is the chosen environment for a group of scholars but not the sole channel of those units’ research activity. In contrast to CENS and SSKH, SSH is a unit that provides a full spectrum of university education from undergraduate to doctorate. CENS works in close collaboration with the Nordic Studies programme at the Department of World Cultures, where many of the researchers teach courses. At SSKH, research is conducted mainly within two main research themes (Welfare and social services, Health and society) or within one of the
interdisciplinary research centers (Centre for Research on Ethnic Relations and Nationalism). Those members of the RC that hold a professorship, a lectureship or other university position carry the normal workload in teaching and university administration as there is no system of sabbaticals or compensation for large-scale research leadership tasks at UH.

In terms of operational conditions, the Nordic Centre of Excellence NordWel provides the core platform of RC collaboration. NordWel is hosted by the three partners and coordinated at SSH. It is funded by NordForsk’s NCoE Welfare Programme. NordWel could be described as the spine around which the RC members congregate. NordWel has a full-time coordinator who is responsible for communication which is required to hold the structurally decentralised RC together. NordWel’s funding for mobility is essential for operationalizing the RC’s focus on enhancing the visibility of the Nordic experiences. In addition to a seminar series under the name NordWel Helsinki, all three partners organize regular seminars that are of prime importance as fora for both research training and other scholarly discussion.

The operations run by exclusively external funding necessitate a specialised administrative workforce. While SSH cannot provide any administrative support for a research project, NordWel is administered by its full-time coordinator. CENS has a full-time research director and a coordinator. In addition, the project administration unit of the UH finance department provides financial services for NordWel and CENS. At SSKH, research is administratively headed by a research director and a research council, and administrative support is given by a research amanuensis.

The ratio of academic to administrative staff is in the RC very high. At CENS, there are about 10 researchers working full-time and about 20 ”affiliated researchers” within and outside the university. The affiliated researchers, largely internationally renowned scholars from a global selection of universities, are concretely, (i.e. economically), tied to CENS by leading research projects and networks, and by giving courses for the Nordic Studies programme. In addition to the full-time researchers of NordWel and its associated projects employed at UH, many other RC members participate in the international network of ca 300 researchers around the NCoE.

- RC’s strengths and challenges related to operational conditions, and the actions planned for their development.

NordSoc has added value to the coherence of research and teaching at UH, as the members of the RC carry on in their university duties while undertaking cutting-edge international research. The partner units have received significant European and Nordic funding that enables the RC to examine Nordic society in both European and global contexts.

Three challenges must be met. That CENS has been so successful in funding competition makes it vulnerable. Not only is there a risk that the funding fades, but the lack of permanent mid-career and senior positions makes it increasingly difficult to retain the successful researchers, as they leave for institutions with more secure long-term perspectives. Second, a sustainable balance between teaching and administration workloads and the demands of widening international collaboration has to be reached. Despite progress in virtual communication, international research networking often means travelling abroad during the academic term. Third, continuity of operational conditions beyond NCoE funding (~2012) is uncertain.
6 LEADERSHIP AND MANAGEMENT IN THE RESEARCHER COMMUNITY (MAX. 4400 CHARACTERS WITH SPACES)

- Description of the execution and processes of leadership in the RC, how the management-related responsibilities and roles are distributed in the RC and how the leadership- and management-related processes support high quality research, collaboration between principal investigators and other researchers in the RC, the RC’s research focus and strengthening of the RC’s know-how.

NordSoc is a research community of several interlinked cooperating projects rather than a single research group with clearly defined limits, hierarchies and divisions of labour. As the NCoE NordWel is currently the core operational linkage between the collaborating units, the director of NordWel, Pauli Kettunen (SSH), is assigned the status of the responsible person of the RC.

Informal leadership processes and flexible management structure allow NordSoc and its constituent parts to be highly responsive to emergent research topics and forms of collaboration. The overarching theme in the leadership of NordSoc is to empower young researchers by giving them responsibility in organizing seminars and other events and pursuing own research ideas. One example of the merits of this leadership attitude is the migration research network which started as a network of doctoral candidates.

As individual research projects have their designated principal investigator(s) with budgetary and financial responsibility, the task of the NordSoc leadership is mainly to support these projects and networks in terms of fundraising and networking as well as give researchers’ initiatives their academic (networks) and administrative (application techniques) support. In this respect, the special status of Professor Bo Stråth, the FiDiPro-chair holder at CENS, is acknowledged. But also regarding the initiatives of junior researchers the establishment of research projects and networks (meetings, workshops, dinners) within a broad scale of research fields is actively encouraged. The academic performance of the leadership of the RC enables it to initiate collaboration with international researchers of the highest standard.

Both in terms of leadership and management the international structures of NordWel are very important. NordWel research is organized in five theme groups, Helena Blomberg (SSH) being a leader of the theme group Value Systems and Legitimacy in the Nordic Welfare Model. NordWel has an international reference group that comprises of 9 leading scholars of the field from both Europe and the US. In addition, the leaders of the 7 foreign partner institutions of NordWel form the management group of NordWel. These scholars are a resource for NordSoc leadership and management in terms of benchmarking and mutual learning.

For management of such a large though decentralized enterprise, a strict separation of administrative and academic tasks would be counter-productive. The posts of directors and coordinators in the projects involved in NordSoc are held by academics who take their share of the administration, too. Of course, financial routine work is taken care of by professionals, but work related to, e.g., editing publications, organizing workshops, seminars and conferences and so on are best taken care of by persons with academic performance as well.

- RC’s strengths and challenges related to leadership and management, and the actions planned for developing the processes.

NordSoc’s strength is its egalitarian and self-organizing leadership structure. This necessitates however certain continuity in management and the building of “know-how” that has for the time being been
provided by the collaboration in the NCoE NordWel. One of the main challenges is to institutionalize the collaboration after the NCoE period is over in 2012. NordSoc’s main challenge is to prove that it is possible to develop close, institutionalized, and interdisciplinary collaborative scheme across the faculty boarders at the UH.

For this purpose we envision three permanent senior positions that will be the driving forces in the furthering of the interdisciplinary collaboration, as well as in the mobility processes and the internalization of the university. (see question 8)

### 7 External Competitive Funding of the RC

- **Listing of the RCs external competitive funding, where:**
  - the funding decisions have been made during 1.1.2005-31.12.2010, and
  - the administrator of the funding is/has been the University of Helsinki

- **Academy of Finland (AF)** - total amount of funding (in euros) AF has decided to allocate to the RC members during 1.1.2005-31.12.2010: **4550000**

- **Finnish Funding Agency for Technology and Innovation (TEKES)** - total amount of funding (in euros) TEKES has decided to allocate to the RC members during 1.1.2005-31.12.2010:

- **European Union (EU)** - total amount of funding (in euros) EU has decided to allocate to the RC members during 1.1.2005-31.12.2010: **200000**

- **European Research Council (ERC)** - total amount of funding (in euros) ERC has decided to allocate to the RC members during 1.1.2005-31.12.2010: **1580000**

- **International and national foundations** - names of international and national foundations which have decided to allocate funding to the RC members during 1.1.2005-31.12.2010, and the amount of their funding (in euros).
  - names of the foundations: NordForsk 3500000
  - NorFa 110000
  - NOS-HS 50000
  - Nordplus 30000
  - European Science Foundation 180000
  - Riksbanken Jubileumsfond 10000
  - Työsuojelurahasto 320000
  - Koneen säätiö 310000
  - Svenska kulturfonden 80000
  - Thure Gallén’s stiftelse 40000
  - Ehrnrooths stiftelse 120000
  - total amount of funding (in euros) from the above-mentioned foundations: **4750000**

- **Other international funding** - names of other international funding organizations which have decided to allocate funding to the RC members during 1.1.2005-31.12.2010, and the amount of their funding (in euros).
INTERNATIONAL EVALUATION OF RESEARCH AND DOCTORAL TRAINING AT THE UNIVERSITY OF HELSINKI

RC-SPECIFIC STAGE 2 MATERIAL

- names of the funding organizations: London Metropolitan University 10000
  - Danish Research School 10000
  - SYNDEx 10000
  - total amount of funding (in euros) from the above-mentioned funding organizations: 30000

- Other national funding (incl. EVO funding and Ministry of Education and Culture funded doctoral programme positions) - names of other national funding organizations which have decided to allocate funding to the RC members during 1.1.2005-31.12.2010, and the amount of their funding (in euros).
  - names of the funding organizations: Ulkoasiainministeriö 200000
  - Politus/Vakava 10000
  - total amount of funding (in euros) from the above-mentioned funding organizations: 210000

B RC’S STRATEGIC ACTION PLAN FOR 2011–2013 (MAX. 4400 CHARACTERS WITH SPACES)

- Description of the RC’s future perspectives in respect to research and doctoral training.

  The RC aims at improving the conditions for research and research training by three separate but related initiatives.

  First, we wish to establish three senior researcher level positions, which would guarantee the future collaboration between the three participating organisations of the RC by initiating new research projects and network. These "broker" senior researcher positions would be comparable to research coordinator in the current university vocabulary, but they would not be tied to a particular research project, but to a larger researcher community. A broker senior researcher would not merely coordinate an existing project, but use his/her knowledge and experience to proactively initiate new projects and networks. This would mean that they would ensure continuity in the cooperation between the partners of the RC, while simultaneously improving its position in the academic field both nationally and internationally. It is important that the broker docents have ambitious research careers of their own.

  Secondly, it is of utmost importance that we succeed in enrolling young researchers in the RC, and therefore we are planning to create a common research school in Nordic studies, with the support from the Academy of Finland and/or from different Nordic funds. The doctoral students who are enrolled in this research school would be working at one of the three participating institutions, while enjoying the supervision and the benefits of the multidisciplinary environment provided by the RC as a whole. By the arrangement of common seminars and events, the doctoral students would also be pivotal in guaranteeing the future collaboration between the institutions. A special challenge is to secure the international mobility of the doctoral students, which was so eminently provided by the NordWel network. For this purpose some special funding needs to be targeted.

  Thirdly, as part of the internationalization and dissemination strategy of the RC, we are initiating a web-platform called "Nordic Studies in the World" (NSW) that would serve as a tool for communication between Nordic studies departments around the world (e.g. in Greifswald, Chicago, Seoul, Fudan), linking researchers, teachers and students with each other. Especially in Asia there seems to be a demand for information on and contacts to Nordic scholars with an expertise on the welfare state, on international relations, and on issues related to education. However, the NSW would not only be directed towards the academia, but also to government, commercial organisations and NGOs as well as to general public. By producing own material in the form of expert columns and reviews of literature and reports, the NSW would serve as a window to anyone interested in the Nordic countries and Nordic issues. In continuation of this, it would, for example, be possible to establish a Nordic think thank
INTERNATIONAL EVALUATION OF RESEARCH AND DOCTORAL TRAINING AT THE UNIVERSITY OF HELSINKI

RC-SPECIFIC STAGE 2 MATERIAL

(NordThink) which on the one hand could articulate new trends and directions for Nordic cooperation and for the Nordic argument in the political debates, and, on the other hand, could respond with topical surveys without first having to go through the time-consuming process of establishing a research project.

Four general meetings of the RC have been arranged in November 2010 - February 2011 for discussing the questions and materials. Between the meetings the RC leaders have met and prepared drafts to be discussed and commented by RC members. In addition, all RC members have had an opportunity to comment the questions by email.

9 SHORT DESCRIPTION OF HOW THE RC MEMBERS HAVE CONTRIBUTED TO THE COMPILATION OF THE STAGE 2 MATERIALS (MAX. 1100 CHARACTERS WITH SPACES).

The bibliometric analyses by Helsinki University Library (HULib)

Background: The bibliometric analyses – especially citation analyses – have raised a lot of discussion and critics among researchers in social sciences and humanities. Researchers view that bibliometric analyses are often unfair to these fields of sciences because they do not give a good enough picture of the publishing. Citation databases – Web of Science and Scopus – cover only weakly the main publications in these fields. Also, in humanities and social sciences monograph is still the main form of publishing, and it does not include in these article databases.

At the University of Helsinki, the above mentioned concerns have been taken into account in the evaluation. The Evaluation Office has ordered analyses from the Helsinki University Library (HULib) for the participating researcher communities that are weakly represented in Web of Science. The database for the HULib analyses is TUHAT (https://tuhat.halvi.helsinki.fi/portal/en/) including all the publications that the researchers have considered important.

Based on this data, information specialists at HULib have carried out the following analyses:

1) Number of authors/publication/year as a table; a pie of authors/publication in the period 2005-2010;
2) Language of publication/year; a pie of language of publication in the period 2005-2010;
3) Articles/journal/year; journals have been compared by ISSN with the Norwegian, Australian and ERIH (2007-2008) journal ranking lists; number of articles in ranked journals;
4) Publisher/monograph type (according to TUHAT database); monographs have been compared with the Norwegian publisher ranking list. According to this, it has been counted how many monographs are published by a leading scientific publisher (2) or a scientific publisher (1).
5) Conference publications (from TUHAT database) especially in computer sciences; compared with the Australian conference ranking list.

Where relevant, some additional analyses and notes concerning the publication culture of a scientific field have been added. Overall, these analyses complement the other evaluation material and lists of the publications of the participating researcher communities.

If the publications of the RCs were less than 50 or/and the internal coverage less than 40 percentage, the WoS analyses were considered not reliable. These RCs were 58 altogether.

In addition, both Leiden and Library analyses were done to the RCs if WoS analyses covered less than 40 per cent of the peer review (A+C) publications of the RC. These RCs were 8 altogether.

The appendix includes the analyses of the RC under discussion.
Analysis of publications by Helsinki University Library – 66 RCs altogether

<tr>
<td>A*</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Typically an A* journal would be one of the best in its field or subfield in which to publish and would typically cover the entire field/subfield. Virtually all papers they publish will be of a very high quality. These are journals where most of the work is important (it will really shape the field) and where researchers boast about getting accepted. Acceptance rates would typically be low and the editorial board would be dominated by field leaders, including many from top institutions.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
The majority of papers in a Tier A journal will be of very high quality. Publishing in an A journal would enhance the author’s standing, showing they have real engagement with the global research community and that they have something to say about problems of some significance. Typical signs of an A journal are lowish acceptance rates and an editorial board which includes a reasonable fraction of well known researchers from top institutions.

Tier B covers journals with a solid, though not outstanding, reputation. Generally, in a Tier B journal, one would expect only a few papers of very high quality. They are often important outlets for the work of PhD students and early career researchers. Typical examples would be regional journals with high acceptance rates, and editorial boards that have few leading researchers from top international institutions.

Tier C includes quality, peer reviewed, journals that do not meet the criteria of the higher tiers.

**ERIH ranking 2007-2008**

Purpose of The European Reference Index for the Humanities (ERIH) is to develop and to maintain an impact assessment tool for European research journals. Journal classification processes are conducted by discipline-specific expert panels. In the ERIH 2007 Initial List there are three categories:

A = international publications, both European and non-European, with high visibility and influence among researchers in the various research domains in different countries, regularly cited all over the world.

B = international publications, both European and non-European, with significant visibility and influence in the various research domains in different countries.

C = European publications with a recognized scholarly significance among researchers in the respective research domains in a particular readership group in Europe; occasionally cited outside the publishing country, though the main target group is the domestic academic community.
